

Barrow In Bloom 2021

Wildflowers in Millennium Park 15th October 2021

It was a glorious autumn morning when we rotovated a small wavy strip of grass banking in Millennium Park. This short little strip of land should blossom with lots of native wildflowers in spring summer 2022.

The wildflower seed mix contains twenty-six native British wildflower species, consisting of mainly perennial species and a handful of annual and biennial species to create a permanent area of pure wildflowers.

The species included in this mixture create an attractive display from May to October and is suitable for creating habitats for bees, butterflies and other pollinating insects. It contains a wide range of species to create a diverse environment and range of food to support local wildlife.

Thanks to the Coop for the funding for purchasing the seeds, The Parish Council for funding the hire of the rotavator and permission to plant the seeds.

Thanks to volunteers, Sam, Simon and Annette for helping and to Mark for all advice and hard work on the day.
