

# Tree of the Month

**April 2021**

Is awarded by **Wild About Barrow** to

**Cherry Tree (Prunus)  
Ennerdale Road**

**Nominated by Mrs Janet Soars**

*For its glorious blossom in springtime and the joy our grandchildren and other children have on the swing. It brightens every day in spring.*

There are many Cherry varieties ranging from Europe to North America and Asia. Cherry trees require a certain number of chilling hours to break dormancy and that's why they are not seen in tropical climates.

Just stand underneath and soak in the beautiful canopy in bloom!
