

Barrow upon Soar Station Adoption Group

Sunday 26th January 2025

The gardening team were out today with general tidying, weeding and removing sycamore seedlings whilst tiny and easy to pull.

A few more of us were out cutting back some overhanging branches that form a canopy over our sleeper planters and prevent the areas from getting the benefit of rain water in the summer. We only had a small team today as we needed to be sure of the safety precautions we we put in place. All material cut back was then used to create natural habitat piles - great for encouraging more wildlife into this lovely space.

Great work from both teams - Julie, Bill, Nick, Honor, Bob, Steve and Jane
